

slimlens

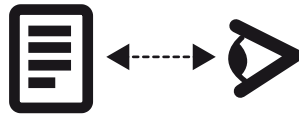

reading glasses

test for presbyopia

what is your visual acuity at close distances?
take a self-test for an initial assessment

print out this test

hold the page at a distance of **14 to 16" (35 to 40 cm)** in front of your eyes. That corresponds approximately to the usual reading distance.

read the text below row by row without glasses, starting from the top. when you begin to face difficulties, note the number on the right of that text line. **this number corresponds to your diopter.**
